## TROPICAL CYCLONE BULLETIN NR. 9

### Typhoon GORIO (PODUL)

Issued at 5:00 AM, 13 August 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

**“GORIO” SLIGHTLY INTENSIFIES AS IT BEGINS TO APPROACH THE EASTERN COAST OF SOUTHERN TAIWAN.**

#### Location of Center (4:00 AM)

The center of the eye of Typhoon GORIO was estimated based on all available data at **165 km Northeast of Itbayat, Batanes (21.9°N, 122.9°E).**

#### Intensity

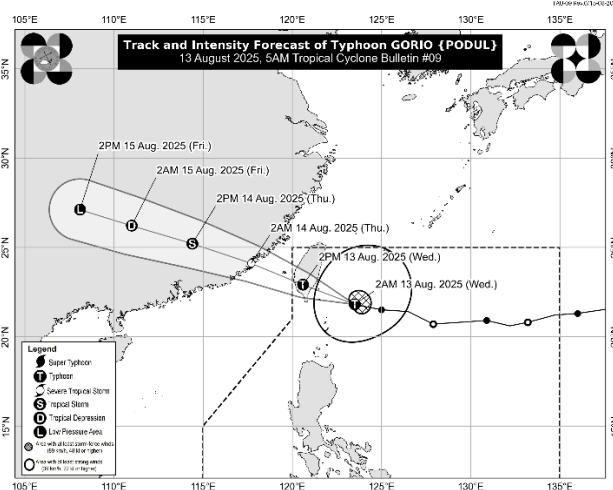

Maximum sustained winds of **140 km/h** near the center, gustiness of up to **170 km/h**, and central pressure of **965 hPa**

#### Present Movement

**West northwestward at 25 km/h**

#### Extent of Tropical Cyclone Winds

**Strong to typhoon-force winds** extend outwards up to **400 km** from the center

#### TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
<b>12-Hour Forecast</b> 2:00 PM 13 August 2025	22.9	120.6	270 km North Northwest of Itbayat, Batanes or in the vicinity of Kaohsiung City, Taiwan	120	TY	WNW 25
<b>24-Hour Forecast</b> 2:00 AM 14 August 2025	24.1	117.7	565 km Northwest of Itbayat, Batanes or in the vicinity of Fujian, China (OUTSIDE PAR)	95	STS	WNW 25
<b>36-Hour Forecast</b> 2:00 PM 14 August 2025	25.2	114.4	905 km Northwest of Extreme Northern Luzon or in the vicinity of Guangdong Province, China (OUTSIDE PAR)	75	TS	WNW 30
<b>48-Hour Forecast</b> 2:00 AM 15 August 2025	26.2	111.0	1,260 km West Northwest of Extreme Northern Luzon or in the vicinity of Guangxi, China (OUTSIDE PAR)	45	TD	WNW 30
<b>60-Hour Forecast</b> 2:00 PM 15 August 2025	27.1	108.1	1,565 km West Northwest of Extreme Northern Luzon or in the vicinity of Guizhou, China (OUTSIDE PAR)	-	LOW	WNW 25

## TROPICAL CYCLONE BULLETIN NR. 9

### Typhoon GORIO (PODUL)

Issued at 5:00 AM, 13 August 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
<b>2</b> Wind threat: <b>Gale-force winds</b>	<b>Batanes</b> (Itbayat)	-	-
Warning lead time: <b>24 hours</b> Range of wind speeds: <b>62 to 88 km/h (Beaufort 8 to 9)</b> Potential impacts of winds: <b>Minor to moderate threat to life and property</b>			
<b>1</b> Wind threat: <b>Strong winds</b>	<b>The rest of Batanes</b>	-	-
Warning lead time: <b>36 hours</b> Range of wind speeds: <b>39 to 61 km/h (Beaufort 6 to 7)</b> Potential impacts of winds: <b>Minimal to minor threat to life and property</b>			

## OTHER HAZARDS AFFECTING LAND AREAS

### Heavy Rainfall Outlook

Refer to **Weather Advisory No. 4 issued at 5:00 AM today** for the heavy rainfall outlook due to TC GORIO.

### Severe Winds

**The wind signals warn the public of the general wind threat over** an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the localities where Wind Signal No. 2 is hoisted.
- **Minimal to minor impacts** from strong winds are also possible within any of the areas under Wind Signal No. 1.

Should there be a southward shift in the track forecast and changes in radius, the expansion of areas under Wind Signals is possible.

The enhanced Southwest Monsoon will bring **strong to gale-force gusts** over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Babuyan Islands, the northern portion of mainland Cagayan, the eastern portion of Isabela, and the northern portion of Ilocos Norte.

### Coastal Inundation

While no storm surge warning is hoisted, there may be an increased potential for coastal flooding due to high waves near the coast, especially if the track forecast shifts further south.

## TROPICAL CYCLONE BULLETIN NR. 9

### Typhoon GORIO (PODUL)

Issued at 5:00 AM, 13 August 2025

Valid for broadcast until the next bulletin at 11:00 AM today.

#### HAZARDS AFFECTING COASTAL WATERS

**A Gale Warning is in effect over the seaboard of Extreme Northern Luzon.** Refer to Gale Warning No. 2 issued at 5:00 AM today.

##### 24-Hour Sea Condition Outlook

**Up to very rough seas over the following coastal waters:**

- **Up to 9.0 m:** The seaboard of Batanes
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

**Up to rough seas over the following coastal waters:**

- **Up to 3.5 m:** The northern and eastern seaboard of Babuyan Islands
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

**Up to moderate seas over the following coastal waters:**

- **Up to 2.5 m:** The remaining seaboard of Babuyan Islands; the northeastern seaboard of mainland Cagayan
- **Up to 2.0 m:** The remaining seaboard of mainland Cagayan; the seaboard of Isabela; the northeastern seaboard of Aurora
- **Mariners of motorbancas and similarly-sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

#### TRACK AND INTENSITY OUTLOOK

- GORIO is forecast to move west northwestward for the entirety of the forecast period. Based on its current track, GORIO may make landfall over the eastern coast of southern Taiwan today and exit the Philippine Area of Responsibility (PAR) this afternoon or evening.
- GORIO is forecast to remain as a typhoon prior to its landfall over Taiwan, before weakening throughout the remainder of the forecast period.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
