# TROPICAL CYCLONE ADVISORY NR. 5 Severe Tropical Storm PODUL

Issued at 11:00 AM, 10 August 2025 Valid for broadcast until the next bulletin at 11:00 PM today.

#### SEVERE TROPICAL STORM "PODUL" CONTINUES TO ACCELERATE WHILE MAINTAINING ITS STRENGTH.

# Location of Center (10:00 AM)

The center of Severe Tropical Storm PODUL was estimated based on all available data at 1,680 km East of Extreme Northern Luzon (OUTSIDE PAR) (21.7°N, 138.0°E).

#### Intensity

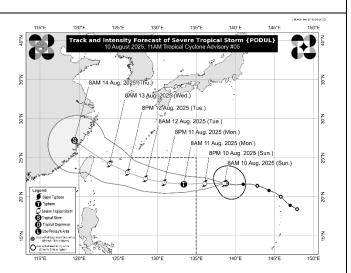

Maximum sustained winds of 110 km/h near the center, gustiness of up to 135 km/h, and central pressure of 985 hPa.

#### **Present Movement**

#### Westward at 25 km/h

# **Extent of Tropical Cyclone Winds**

Strong to storm-force winds extend outwards up to 280 km from the center

#### TRACK AND INTENSITY FORECAST

	Center Position			Intensity		Movement
Date and Time	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	dir. and speed (km/h)
12-Hour Forecast 8:00 PM 10 August 2025	21.7	136.1	1,485 km East of Extreme Northern Luzon (OUTSIDE PAR)	110	STS	W 20
24-Hour Forecast 8:00 AM 11 August 2025	21.6	133.4	1,205 km East of Extreme Northern Luzon	120	TY	W 25
36-Hour Forecast 8:00 PM 11 August 2025	21.8	130.9	945 km East of Extreme Northern Luzon	110	STS	W 20
48-Hour Forecast 8:00 AM 12 August 2025	22.3	128.5	710 km East Northeast of Itbayat, Batanes	110	STS	WNW 20
60-Hour Forecast 8:00 PM 12 August 2025	23.1	126.2	520 km East Northeast of Itbayat, Batanes	100	STS	WNW 20
72-Hour Forecast 8:00 AM 13 August 2025	24.2	123.9	435 km North Northeast of Itbayat, Batanes	100	STS	WNW 20
96-Hour Forecast 8:00 AM 14 August 2025	27.2	119.4	755 km North Northwest of Itbayat, Batanes or in the vicinity of Fujian, China (OUTSIDE PAR)	75	TS	NW 25

## TROPICAL CYCLONE ADVISORY NR. 5 **Severe Tropical Storm PODUL**

Issued at 11:00 AM, 10 August 2025 Valid for broadcast until the next bulletin at 11:00 PM today.

#### GENERAL OUTLOOK FOR THE FORECAST PERIOD

- PODUL is less likely to directly affect the weather and sea conditions in the country within the next five days.
- PODUL is forecast to move generally westward today and tomorrow (11 August), then west northwestward or northwestward from Tuesday (12 August) through the end of the forecast period. PODUL may enter the Philippine Area of Responsibility between tonight and tomorrow early morning. On the track forecast, PODUL may pass close or over the southern Ryukyu Islands on Wednesday (13 August) morning. Furthermore, a landfall scenario over Taiwan on Wednesday afternoon or evening is also not ruled out.
- There is large uncertainty in the projected track and intensity of PODUL from Monday through the end of the forecast period since any northward or southward shift in the track forecast will significantly change the intensity forecast. All are advised to continue monitoring subsequent tropical cyclone advisories for PODUL.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to continue monitoring for updates related to this tropical cyclone.

Unless there is an intermediate issuance, the next tropical cyclone advisory will be issued at 11:00 PM today.
